Curriculum Details

Curriculum type : Local

Curriculum planning

We provide a diversified range of integrative activities and games for our children to develop in thinking, language, perception and social aspects through personal inquiry, experience and teacher-student interaction, form good living habits and moral character by experiencing social life and build a solid foundation for learning.

We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.

Learning / Teaching approach & activities

We design learning themes according to children's interests and life experiences. With a teaching approach based on stories, activities and projects, we help children acquire and apply knowledge, and develop their abilities in reading, writing and calculating. Children are arranged to participate in visits and community activities to enrich their experiences.

Assessment of children's learning experiences

Continuous observation and assessment system has been established to provide children developmental assessments in various areas and promote holistic development in children mind and body.
