Curriculum Details

Curriculum type : Local

Curriculum planning

Our integrated curriculum is designed according to children's physical and mental development to cater to their abilities and interests. It places balanced emphasis on all the five major areas. We have English and Mandarin classes taught by native English and Putonghua teachers.

We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.

Learning / Teaching approach & activities

Thematic Approach, group activities, Project Approach, etc. are used to develop children's generic abilities and encourage self-learning ability. Our story-based teaching approach is used for improving children's biliteracy and trilingualism levels. Children enrich their hands-on experiences and improve their learning interest by participating in visits, science experiments and other activities.

Assessment of children's learning experiences

The school carries out continuous observations & assessments, supplemented by children's books, homework, etc., to assess children's all-round development; Every child is provided with a "Development Portfolio" to record and analyze the overall development.
