Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Our Curriculum focuses on the balanced development of children and provides diversified learning experience, to cater to children's physical and mental development, abilities, interests and experiences. In order to promote the language development of young children, our school employs Native English and Mandarin teachers who use a variety of activities and games to enhance biliterate and trilingual language learning. We offer comprehensive courses in music, athletics and arts, as well as a variety of arts activities for young children to express their thoughts and emotions while also aiding their physical development and developing their creative thinking and aesthetic ability. The school attaches great importance to the cultivation of children's moral character. Through dramatic storytelling methods, children can cultivate positive values and attitudes about getting along with others.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>To allow for the children's comprehensive and balanced development, we employ child-based teaching approaches, such as theme- and project-based teaching, and provide real-life contexts for learning. We design and offer a variety of learning activities and create learning zones based on the children's abilities and interests to develop their capacity for self-directed and constructive learning, problem solving and creativity. In addition, based on subjects and learning needs, we organize visits, outdoor learning, community services, etc., which aim to expand the children's experiences and knowledge. At the same time, by participating in different types of performances and competitions, children can boost their self-confidence, team spirit, artistic expression and creative potential.</p>	
Assessment of children's learning experiences	
<p>Children's physical and mental development and learning performance are analyzed through continuous assessment. We provide observation records in order to give proper guidance and feedback of learning and teaching.</p>
