Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>By means of stories as the theme in teaching, we arrange the learning progress from the shallower to the deeper according to the development of children. We will also conduct class-based project learning activities in each class according to the children's interest. Meanwhile, based on children's individual learning needs, we design hierarchical games to allow children to learn through the game, and to take care of the differences between students. The content of the course emphasizes positive education, moral education, arts, investigation and games as the principles of curriculum design to foster the whole-person development of children.</p>	
<p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Game-based learning approach and a variety of learning activities enable the children to "learn through experiences". These activities include outings, little experiments, snack cooking, painting and visits. We also focus on self learning, aiming to improve children' abilities in social intercourse, problem solving and self-care in an interactive manner.</p>	
Assessment of children's learning experiences	
<p>Through continuous observation, evaluation and feedback, we affirm children's development and learning situation, which is based on the balanced development goals of children's moral, intellectual, physical, social and aesthetic aspects of virtues as the main focus. The assessment records to reflect the situation of children's development. In addition to the data and chart records, there will be more detailed text analysis that fully reflects the children's learning achievement and progress.</p>
