Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Our school raises children with biblical truth as its values. Through free play and designing enlightening learning activities, children can "learning by doing" thereby developing children's potential, creative thinking, problem-solving ability, exploration spirit and independent learning ability. It will also stimulate children's learning through thematic teaching and project-based learning. At the same time, it will cooperate with diversified activities such as site visits, school picnic, game days, birthday parties, parent-child reading programs and community activities, etc., allow children to gain personal experience from different activities and strengthen learning and development.</p>	
Assessment of children's learning experiences	
<p>Through continuous observation and periodic evaluation, record the development of children's language, early mathematics, science, physique, aesthetics, emotions, social skills and self-care ability. We collect children's works and evaluation samples, organize and analyze the children's personal development files, so as to understand the performance of children in all aspects, and regularly report and communicate with parents to promote children's learning ability and realize children's potential.</p>
