Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>We randomly create children-centred courseware, design diversified theme-based "activities", adopt interactive learning programmes and pay attention to children's individual difference; we do not use textbooks; we respect and accept children's self-selected activities, encourage children to take new things and new challenges, leverage Montessori teaching approach to balance and improve children's self-esteem, and offer independent training to let children explore and think actively.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>We adopt "game-based" activity teaching to promote children's development in graphic thinking, intelligence, language use, mathematical logic, problem solving, fantasy and creativity, social norms, peer culture and self-consciousness; we teach mainly in Cantonese and English, supplemented with Mandarin and English stories; we adopt group-based classroom teaching and hold outdoor activities and visits to enable children to learn from first-hand experience.</p>	
Assessment of children's learning experiences	
<p>We evaluate children's development based on on-going observation and regular assessment instead of on results of "tests and examinations"; we set up a "Children's Study Portfolio" to record children's development in six learning fields and nine generic skills; we issue two "Children's Progress Reports" every year.</p>
