| Curriculum Details | |
|--|--|
| Curriculum type : Local | |
| Curriculum planning | |
| <p>A series of diversified learning activities are designed based on children's needs in development. This promotes balanced development in multiple intelligences such as language ability, mathematical logic, interpersonal communication, self-reflection, musical rhythm, body movement, visual art and spatial concepts and observation of the Nature. Through this, children gain knowledge and skills besides fostering accurate attitudes towards the self and things around them.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p> | |
| Learning / Teaching approach & activities | |
| <p>Thematic and project-based teaching is given in child-centered approach. The contents include: experiments, simulation activities, creative activities, site visits, parent-child activities and reading schemes. The aim is to ignite learning motives and encourage children to search and build up knowledge voluntarily through the activities.</p> | |
| Assessment of children's learning experiences | |
| Learning outcome is recorded through ongoing observation. | |
