Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Through learning and exploration in life, we will implement a 'child-centredness' learning and teaching curriculum. The learning content is coordinated and coherent, practice biliteracy and trilingual teaching (Putonghua, English Phonics), combine learning with interaction, visits, and personal experience, and cooperate with emotional education to make children 'Ethics, intellect, motor, social skills and aesthetics' equal the five virtues of a balanced development.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Through design activities, picture book teaching, group learning and different extracurricular activities, coupled with the stimulation of the environment, the children's autonomous learning ability is constructed. With the 5 core values of IAIE, we deliberately cultivate children's attitudes of respect, trust, optimism and caring towards others, and join the Kimochis social intelligence learning course and three-tier intervention model to strengthen students' social and emotional IQ, comprehensively enhance children's different potentials, take care of children's individual differences, and induce children's motivation to learn.</p>	
Assessment of children's learning experiences	
<p>The school uses continuous and summative assessments to evaluate children's learning progress, and then cooperate with children's school life reports to set up individual learning history files for each child to record the child's performance and issues reports regularly to let parents understand their child's learning progress.</p>
