Curriculum Details

Curriculum type : Local

Curriculum planning

An appropriate curriculum designed according to children's needs in development, abilities, interests and life experiences besides promoting the development of multiple intelligences. Various extra-curricular activities are organized based on the themes of the modules learned to create enjoyable environment for children to learn.

We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.

Learning / Teaching approach & activities

Activity-based approach – Children learn to relate what is learnt with daily lives through personal exploration, observation, inference, interaction, questioning and the routine learning environment. Group learning, interest groups, topic-based activities, site and friendly visits are arranged so children learn with peers and put the theory of 'to learn in daily life' into practice.

Assessment of children's learning experiences

Children's learning efficacy is observed, recorded and assessed on an ongoing basis.
