Curriculum Details

Curriculum type : Non-local

Curriculum planning

We provide high-quality holistic education in pursuance of cultivating children's positive values and attitudes through a happy learning environment. Our bilingual curriculum written by highly educated early-childhood education specialists covers multiple areas of study to enhance children's comprehensive ability to listen, express, read and write. We develop children's language, social skills, artistic abilities, and many other aspects of their personality while simultaneously inspiring them with a global perspective.

Learning / Teaching approach & activities

Our curriculum is heavily influenced by the spiral and theme learning approaches. Our diversified activities create fun and learning motivation for students through fun activities. Utilization of current technology in classrooms keeps students up-to-date with the modern world. Children interact with both native Chinese and English speakers on a daily basis, in which accelerates their ability to interact in a multi-language environment. Our quality instruction, interactive grouping activities, engaging scientific explorations, exciting outdoor visits, aesthetic festival celebrations, and other learning activities ensure our students receive a well-rounded and enriching educational experience.

Assessment of children's learning experiences

Our teachers would prepare for each student a comprehensive portfolio with photo records and text analysis of their early childhood development, covering various categories such as cognitive awareness, self-ability, social ability, creativity, and physical development. A detailed report of their growth is recorded in the portfolios according to the development scale and academic assessment, which illustrates an overall picture of a student's progress over the year and are presented to parents at the end of each semester in order to comprehensively enhance the development of children in various areas.

School Characteristics

School vision and mission

To cultivate children by providing high-quality education delivered by excellent teachers using advanced learning materials. We desire to inspire children through love and kindness, teaching them core societal values, positive attitudes, and strive for life-long learning. We encourage children to become contributors to the local and global society.

Support to students

Our New Students' Parents Meetings and student adaptation periods will help both parents and students understand and adapt to new school life. Primary school information sessions, simulated primary school interviews, campus tours and simulated adaptation periods prepare our students for their transition to primary school. We also have a students rewards system which encourages children to participate in various extra-curricular activities, as well as large-scale competitions and performances to broaden children's horizons and enhance their self-confidence.

Support to non-Chinese speaking (NCS) students

No information

Support to students with special needs

Link with parents

Parent-teacher association : No information

Other activities / communication with parents

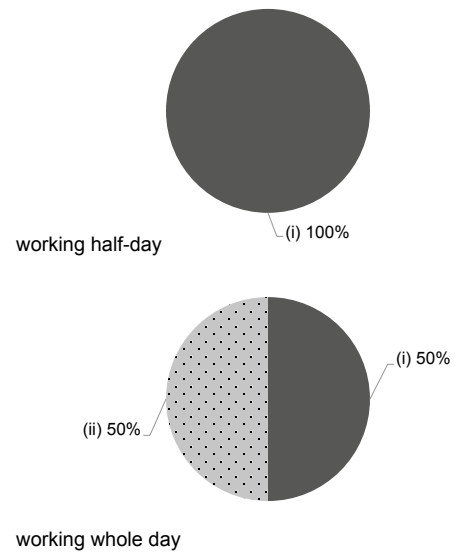

Cooperation between school and parents is of great importance to a child's development. In order to maintain close contact among teachers and parents, teachers keep contact with parents by making regular phone calls to keep track of the child's condition. Parent's day is held bi-annually, during which parents have a one-on-one meeting with their child's teacher. We also maintain a photo album on our website to share the joyful experience of our students. We encourage active parent involvement in school events, for example, Mid-Autumn Festival Gala Night, Autumn picnic, Parent-Child sports day in order to give parents, teachers, and students a chance to interact outside of the classroom.
