Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Our school's curriculum is formulated according to the 'Kindergarten Education Curriculum Guide' (2017). With our core values being child-centered, we have designed a set of distinctive curriculums that revolve around different learning themes based on children's physical and mental health development, as well as the six learning areas according to the Education Bureau. The goal is for our children to be instilled with positive values and attitude, and to acquire skills and knowledge, promoting comprehensive and balanced childhood development. Furthermore, special subject teachers are arranged to teach English, Putonghua, Visual Art and Physical Fitness, in accordance to our curricular needs.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Our curriculum adopts the Thematic approach, allowing our children to learn through play. Our learning activities are formulated by taking children's life experiences, interests and abilities into consideration. Through picture book teaching, project-based study, small group activities, field trips and organised visits, we provide students with the opportunity to gain learning experiences by active exploration, observation and practice; ultimately aiming to foster the ability for self-directed learning.</p>	
Assessment of children's learning experiences	
<p>Our assessment process includes continuous and systematic observation: by collecting students' performance examples in different learning areas, assessment of each unit theme and summative assessment every semester. Gradually we are able to establish a personal learning process profile, recording and evaluating our children's development level.</p>
