Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Focusing on children's "self-learning", children's learning process is triggered through the integration of curriculum, environmental creation, parental involvement, community collaboration and professional support. From the diversified learning area to explore a coherent and integrated curriculum of activities and life education, develop children's ability to actively explore, solve problems and creative thinking, and let them learn from "play" through sensory exploration.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Learning themes based on children's life experiences, combining science and life education. Adopting the mode of program teaching, in-depth exploration of children's interaction with the environment, course content and issues of interest, providing opportunities to discover, think, solve problems, and enrich learning experience. The activity modes include: whole class, group, individual, self-selection and mixed-age games, so that children can explore activities in different learning areas according to their own preferences and paces, construct awareness of the surrounding environment, and promote learning and growth. Different types of visits are arranged according to the theme and season, so that children can learn by participating in practice with their first experience. Care for English learning needs, specialist teachers write courses according to the theme, with children's songs, stories and games. This will foster children's interest and confidence in learning English and lay a good foundation for preparation for future study.</p>	
Assessment of children's learning experiences	
<p>Conduct continuous assessments to observe children's development and learning; collect children's works and activity clips, and record and analyze them in words, systematically edit them into children's history files to support children's growth.</p>	

School Characteristics	
School vision and mission	
<p>The school's aim is to provide coherent, high-quality care and nurturing for preschool children from three to six years old. Inspire children to actively learn and cultivate their independent abilities, so that they can be balance developed in moral, intellectual, physical, group, and beauty aspects. Which will develop good living habits and prepare for future development.</p>
