Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>The school adopts "Whole Brain Development" learning model to enhance the child's self-learning spirit by different sensory learning elements. Students learn through their daily life experience and teacher-student interaction. Also, by children's personal exploration, children can develop multiple intelligence, common ability and good living habits. We believe that through thinking, asking questions, trial and error, experience, communication and participation, students can effectively develop their mind. The school helps children to build a good character in the life education.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>The school takes "Going off campus-Living learning" as the main line. The learning content combines with students' life experience. Through physical coordination, visual and touch, life skills and spiritual care, the school stimulates the logical thinking and all-round development. The course includes different practical studies such as: Native English and Putonghua teachers, using games as a strategy to enrich the language context, barbecue activities, snack tasting, scientific exploration, visits, etc., so that students can learn from their first experience, develop in a balanced manner, enhance their ability to learn independently through different learning elements and build a good foundation for their growth.</p>	
Assessment of children's learning experiences	
<p>Continuous observation and assessment system has been established to provide children developmental assessments in various areas and promote holistic development in children mind and body.</p>
