Curriculum planning	
<p>To enable children to acquire different life experiences through learning, our curriculum is designed with a view to gear to individual needs, to inspire children's creativity, and to cultivate observation ability through a diverse range of aesthetic elements. Our curriculum will be planned in accordance to the new curriculum guidelines, "Learning through Play". Our strategic planning includes the selection of two theme topics from the guidelines each year. Through playing of games, our children are allowed to explore and are provided with the opportunities for directed learning.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>The kindergarten implements "Thematic Teaching Approach". The activities are designed according to children's life experiences, learning needs and integrated with multiple learning areas. The kindergarten adopts "Learning Through Play" as the strategy under the selected themes. Children have the opportunities to take their initiations and exploration in learning through play. Meanwhile, the kindergarten promotes children's language development through "Biliteracy and Trilingualism" teaching activities.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>We compile our integrated curriculum according to the EDB's "Kindergarten Education Curriculum Guide". We focus on the six learning areas and conduct our daily learning activities with thematic and project-based approaches. We hope to foster children's balanced development in the moral, cognitive and language, aesthetics, affective and social, physical and spiritual domains through play and exploration.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>To cater the developmental needs and learning interests of children, we promote learning through play in various learning activities including Putonghua and English lessons. Children are given opportunities to explore and discover through discussions, role-play, games, outings, art and character education activities. We establish children's moral behaviours and build up their positive emotions through home-school collaboration.</p>	
Assessment of children's learning experiences	
<p>We record children's learning progress in conducting theme, small group, music and physical activities through ongoing observation. We also keep parents informed about their children's development and learning progress by distributing the learning portfolio attached with children's photos, artwork samples along with teachers' observation records.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Our curriculum is designed based on the guidelines provided by the education bureau and the developmental, interests, and abilities of children aged 3-6. It includes diverse learning activities in moral education, intelligence, physical fitness, social skills, art, and spiritual education. The learning activities are mainly through games and exploration, with appropriate classroom activities and corner games designed to inspire children's creativity and logical thinking. Our school mainly adopts a "life theme integrated curriculum" and "project-based learning" approach to provide hands-on and experiential game-based learning content, enriching children's learning experiences and cultivating their proactive exploration spirit and problem-solving abilities. Additionally, through the "moral and Christian curriculum," we cultivate children's correct attitudes towards treating others, establish harmonious interpersonal relationships through social interaction with classmates, promote social and emotional development, and enable them to become a new generation with self-esteem, self-discipline, and self-love. Daily routine learning is implemented to enable children to develop self-care abilities and cultivate good habits. Our school creates a language context and implements the "Paired-Reading Scheme" to enhance children's interest and abilities in language, and develop their abilities in listening, speaking, reading, writing, and trilingual abilities.</p>	
<p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>The school utilizes different teaching methods such as "theme-based teaching," "project approach," "small group teaching," and "corner learning" to inspire children's learning interests, needs, and thirst for knowledge. Through programs such as "Family Health Vitamin" and "Love+Reading," we also cultivate children's moral education and language development.</p>	
Assessment of children's learning experiences	
<p>We use a continuous assessment approach to record children's learning performance, achievements and growth. Through observation, recording, and analysis in virtual learning environments, we collect relevant data and store them in individual children's learning development profiles.</p>	

School Characteristics	
School vision and mission	
<p>Vision: In the spirit and love of Jesus Christ, we cultivate the whole person development of our children including their moral, intellectual, physical, social, aesthetic and spiritual development. Mission: Rely on Jesus Christ, united the family and the school; Cultivate our children, taking steps towards a fruitful life.</p>	
Support to students	
<p>Resources supporting our students include: new student adaptation week; support for non-Chinese speaking children; stationing school social work service; provision of appropriate caring services; keeping close contact with parents and external bodies; and use of social resources to support the need of children.</p>	
Support to non-Chinese speaking (NCS) students

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>The school compiles the curriculum according to the "Kindergarten Education Curriculum Guide" of the Education Bureau, allowing young children to develop children's spiritual, ethics, intellect, physique, social skills and aesthetics qualities through games and personal experience. Our school uses Chinese as the daily language. In recent years, it has devoted itself to implementing environmental education and religious integration courses.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Our school is led by specialist teachers to lead English interest activities, and a non-Chinese language learning group is set up to allow non-Chinese speaking children to learn Chinese in an interesting way.</p>	
Assessment of children's learning experiences	
<p>Teachers comprehend children's learning progress and their physical and mental development through continuous observation and logging. Teachers then let parents understand their children's learning situation through distribution of assessment reports, meetings and class observations at various time intervals. The school also takes these opportunities to collect parents' feedback. Finally, we use the Child's Growth Portfolio for the final report.</p>

School Characteristics	
School vision and mission	
<p>School located in Yung Shue Wan, Lamma Island, surrounded by flowers and trees, vast outdoor spaces, children are in touch with nature and participate in outdoor activities in their daily learning, Students come from different countries around the world, get along well on a multicultural campus, enjoy a joyful group life, learn to respect the Lord and love others, care about the community, appreciate and cherish the beautiful things God has created for us.</p>	
Support to students	
<p>We provide activities for new students before a new school year starts so that they could get familiarized with the environment through participating in the activities with their parents. Besides, teachers keep track of children's learning progress through assessment records and observation so that we could provide suitable support to meet individual children's needs.</p>	
Support to non-Chinese speaking (NCS) students	
<p>Received Grant for Support to NCS Students; appoint additional teaching staff / teaching assistants to support NCS students learning Chinese; create an enriched language environment for mastery of the Chinese language; create an inclusive learning environment to facilitate students' integration; facilitate professional development for teachers to develop effective strategies to help NCS students learn Chinese; participate in school-based professional support programmes organised by EDB.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Our school adopts a child-centred curriculum that aligns children's living environment, experiences, interests, and developmental characteristics at different stages; thus, achieving the goal of holistic development. Additionally, moral education is integrated into the curriculum to foster positive values in children.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Our school arranges story-based teaching activities in small groups. Learning activities such as simulation games, exploratory activities, visits, creative activities and gardening activities are designed in accordance with children's developmental characteristics, interests and abilities. This further allows children to learn through interacting with the environment as well as with their teachers and peers. All classrooms are equipped with audio-visual equipment in order to facilitate interactive multimedia learning.</p>	
Assessment of children's learning experiences	
<p>Four assessments are conducted each academic year through continuous observation in order to record children's learning progress and growth. This allows children to recognize their strengths and understand directions for improvement. Moreover, learning portfolios with feedback from teachers, samples of children's work, and event photos, are prepared to record and analyse children's competence. Consequently, this allows teachers and parents to gain a better understanding of children's development.</p>	

School Characteristics	
School vision and mission	
<p>Our school strives to contribute to pre-primary education services by providing children with excellent learning environments, aiming at delivering whole-person education through parent collaborations.</p>	
Support to students	
<p>An adaptation week before school starts and other measures are arranged for new students in order to allow them to gradually adapt to the school environment. Alternatively, primary school life stimulation activities and primary school visits are held for K3 students. With the support of school-based social workers, we also seek to offer effective assistance for children with special needs.</p>	
Support to non-Chinese speaking (NCS) students	
<p>Received Grant for Support to NCS Students; appoint additional teaching staff / teaching assistants to support NCS students learning Chinese; arrange interpretation / translation services; engage NCS parent volunteers to enhance communication between school and parents; create an enriched language environment for mastery of the Chinese language; create an inclusive learning environment to facilitate students' integration; facilitate professional development for teachers to develop effective strategies to help NCS students learn Chinese.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>The school adopts "Whole Brain Development" learning model to enhance the child's self-learning spirit by different sensory learning elements. Students learn through their daily life experience and teacher-student interaction. Also, by children's personal exploration, children can develop multiple intelligence, common ability and good living habits. We believe that through thinking, asking questions, trial and error, experience, communication and participation, students can effectively develop their mind. The school helps children to build a good character in the life education.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>The school takes "Going off campus-Living learning" as the main line. The learning content combines with students' life experience. Through physical coordination, visual and touch, life skills and spiritual care, the school stimulates the logical thinking and all-round development. The course includes different practical studies such as: Native English and Putonghua teachers, using games as a strategy to enrich the language context, barbecue activities, snack tasting, scientific exploration, visits, etc., so that students can learn from their first experience, develop in a balanced manner, enhance their ability to learn independently through different learning elements and build a good foundation for their growth.</p>	
Assessment of children's learning experiences	
<p>Continuous observation and assessment system has been established to provide children developmental assessments in various areas and promote holistic development in children mind and body.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>In accordance with children's ability and interest, we design a curriculum that progresses spirally. We use games to boost children's initiative to learn, to develop their multiple intelligences and to attain balanced development in the domains of ethics, intellect, physique, social skills, aesthetics and spiritual education.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>We adopt different teaching approaches including the thematic approach and the child-oriented approach, which are complemented with diversified activities and interactive learning. We discuss with children according to their interest. We strive to foster children's abilities to concentrate, to think independently, to remember, to create and to discern.</p>	
Assessment of children's learning experiences	
<p>There is on-going assessment for children's learning and physical and mental development. Through children's personal learning portfolio and the biannual Parents' Day, we let parents comprehend their children's balanced development in various aspects.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>We offer international and bilingual curriculum-- Putonghua and English classes. We follow the EYFS curriculum. All of the learning encompasses three important elements – knowledge, skills and manners. We nurture children to attain all-round development in the domains of ethics, intellect, physique, social skills and aesthetics, so as to lay a good foundation for them to pursue studies at local primary schools or international schools.</p>	
Learning / Teaching approach & activities	
<p>With teachers' guidance, children learn self-directed learning, independent thinking, self-discipline, coordinating with others, a considerate and moving heart, etc.</p>	
Assessment of children's learning experiences	
<p>We use continuous assessment with Early years foundation stage targets. Teachers analyse children's ability and performance objectively through observation and logging. In accordance with the curriculum and teaching design, teachers may also set assessment objectives and specific content to choose from, such as behaviour index, anecdotal records, brief extracts of conversations with the child, etc. Through daily observation, record and analysis, we assess children's learning and development situation in the kindergarten.</p>	

School Characteristics	
School vision and mission	
<p>We strive to instill in our children a Worldly Perspective; we focus on nurturing the Creative Minds of our students; we ensure our children enjoy a Caring Environment as if they were at home; and we hope our graduates leave our school with a Happy Soul.</p>	
Support to students	
<p>Through activities for parent education and usual communication, we help parents understand their children's growth characteristics and needs, parents' duties, skills for dealing with their children, strategies for helping children learn and for assisting their growth, including handling issues like primary school adaptation and transition from kindergarten to primary school.</p>	
Support to non-Chinese speaking (NCS) students	
No information	
Support to students with special needs	
No information	
Link with parents	
Parent-teacher association : Yes	
Other activities / communication with parents	
<p>The school encourages parents to participate in volunteer work to help the school carry out activities. It is helpful for parents to develop a sense of belonging towards the school. Activities that help parents to understand our curriculum: parent-child reading, material collection, production of sculptures and paintings, etc. These activities not only help parents set reasonable expectations for their children, but also enhance parent-child relationship, make learning become more coherent, interesting and effective. The once-a-term teacher-parent meeting week strengthens the parent-child communication and relationship. We organize various parent-child activities, such as parent-child outings, parent-child Christmas Carnival, new students' parent meetings, parent meeting for curriculum introduction, parent volunteers, parent-child sports day, charity walk, open day, etc.</p>

Curriculum planning	
<p>ESF Tung Chung International Kindergarten offers English medium and bilingual education for children aged 3 to 5 years. The school is an International Baccalaureate (IB) World School offering the IB Primary Years Programme. IB World Schools share a common philosophy — a commitment to high-quality, challenging, international education — that we believe is important for our students. The learning environment is rich and engaging and children are encouraged to learn through inquiry and hands-on experiences. The programme reflects the kindergartens' PYP curriculum being planned around units of inquiry and is structured upon principles of good early years education. Early literacy and numeracy are integral to the programme. Mandarin Chinese is the specialist language and is integrated into the programme, forming a core aspect of the curriculum.</p>	
Learning / Teaching approach & activities	
<p>The kindergarten caters for K1 and K2 children aged 3 to 5 years who attend for three hours a day, for either a morning or an afternoon session. The kindergarten offers safe and spacious learning environments which are designed especially to meet the needs of young learners. They are all well-resourced with age-appropriate equipment and materials, and modern teaching and learning technology.</p>

Other activities / communication with parents	
<p>We recognise and appreciate the unique role that parents play in their child's education and actively encourage parents to be fully informed about their child's progress and to participate in their kindergarten. We aim to establish a close link between home and school. Outings, excursions, workshops and parent volunteering are different ways for parents to participate in the kindergarten programme and to meet with teachers and other families. Parents are kept informed about what their children are learning, how to help at home, and how their children are progressing during the year through various methods of communication between home and school.</p>

Curriculum Details	
Curriculum type : Non-local	
Curriculum planning	
<p>We follow the British National Curriculum and The Early Years Foundation Stage (EYFS) at Sunshine House with more emphasis on creativity and specifically tailored for children’s multi-cultural experience living in Hong Kong. Our early literacy program is delivered through the Oxford Reading Tree and the Jolly Phonics programs. Additionally, we place a great deal of emphasis on preparing our children for their Primary One admissions, teaching them our “Sunshine Values”, helping them with self-esteem and confidence, and moulding them into the Global Citizens they will become.</p>	
Learning / Teaching approach & activities	
<p>Sunshine House has developed a thematic, cross-curricular approach to early education. Our students explore a wide range of subjects through active participation in individual, group and whole class activities: Arts and Crafts Health and Personal Development Putonghua Music (movement) Reading (storytelling) Talking and Listening Drama Environmental Studies Literature Mathematics Physical Education Structured Play Cooking Each child is unique and develops at his or her own pace. We ask that parents trust us to recognize the signs which indicate that a child is ready to begin to read, write and learn the basic concepts of mathematics, science and music. At Sunshine House, we believe that education is a process - a step by step lifelong progression - and building a proper foundation for this process is our goal.</p>	
Assessment of children’s learning experiences	
<p>We evaluate children’s development based on on-going observation and regular assessment instead of on results of “tests and examinations”. We issue two “Children’s Progress Reports” every year.</p>
