Curriculum planning	
<p>Our school plans the curriculum according to the "Kindergarten Education Curriculum Guide" (2017) using real-life themes to cater to children's interests and abilities, and we design diversified comprehensive activities which allow children to learn through play and to cultivate children's positive values and attitudes.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Game elements, combined with life experiences, are incorporated in learning activities, which can stimulate children's motivation and interest in learning. Creating an interesting corner and environment with sensory exploration can encourage self-directed learning in children, which can foster problem-solving skills and diversified abilities in a growth mindset. At the same time, group activities, outdoor visits, storybook teaching, life education, mindfulness practices etc. allow children to gain more personal life experiences, which could help them to establish a positive and confident learning attitude.</p>	
Assessment of children's learning experiences	
<p>We record children's learning progress through continuous observation and put together a comprehensive record of children's development in the "personal learning file".</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Curriculum is planned in regard to children's interest, physical and psychological development. The principle of 'child-oriented' is adopted and various learning domains, including Language, Self and Society, Early Childhood Mathematics, Art and Creativity, Nature and Living, Physical Fitness and Health.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Individual, group and interactive team activities are organized. Whole Language Natural Learning Approach is adopted and children are encouraged to re-write stories and to create rhymes. Children also express their feelings and opinions through drawing to lay down a good foundation of language. Shared Reading Approach and Phonemic Awareness are also adopted which has strengthened children's English listening and speaking ability. The implementation of Project Learning Approach has nurtured children to learn spontaneously, to communicate with others in a friendlier attitude and to enhance their problem-solving skills and creative thinking. Situational learning activities are arranged to enrich children's daily life experience. Moreover, Orff music learning is applied and children are free to express their emotions.</p>	
Assessment of children's learning experiences	
<p>Continuous assessment throughout the school year is adopted. In reference to the age appropriateness of children, the learning progress of each child will be kept in the 'Children Physical and Psychological Development and Learning Record' and 'Individual Learning Portfolio'. Regular individual meetings with parents to discuss the growth and learning plan of children will be conducted annually.</p>	

School Characteristics	
School vision and mission	
<p>Motto 'Be Faithful, Diligent and Stay Simple; Love God and One Another' We foster the balanced and full development of young children in social, intellectual, physical, moral, spiritual and aesthetic aspects. We hope our children to become the Loving, the Learning and the Leading.</p>	
Support to students	
<p>Moral education is emphasized. 'Children Month' and 'Love and Care Campaign' are launched annually in order to develop children's qualities of forgiving, respecting and loving. To facilitate children's adaption to changing environment, mixed age activities, adaption programmes for newly admitted children and preparation to primary school life are organized. Moreover, various activities, individual guidance and play therapy are organized by the 'Stationing School Social Service Project' in order to support children and families in need.</p>	
Support to non-Chinese speaking (NCS) students	
<p>Received Grant for Support to NCS Students; appoint additional teaching staff / teaching assistants to support NCS students learning Chinese; create an enriched language environment for mastery of the Chinese language; create an inclusive learning environment to facilitate students' integration; facilitate professional development for teachers to develop effective strategies to help NCS students learn Chinese.</p>	
Support to students with special needs	
<p>Joining the On-site Pre-school Rehabilitation Services.</p>	
Link with parents	
<p>Parent-teacher association : Yes</p>	
Other activities / communication with parents	
<p>Parents are invited to lead children activities at school and participate in individual parent interview. There are various ways to enhance parents' better understanding on children's learning progress. The establishment of Parent-teacher Association has also the roles in planning.</p>

Curriculum planning	
<p>Spiritual education is the core of the programs while thematic instruction forms the overall structure. The "High Scope educational approach" ensures the breadth of the programs and the emphasis on project-based learning achieves depth. Plays are the channels through which children learn.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>The school adopts the "plan-do-review" learning process of "High Scope Approach". Children are encouraged to experience, explore, create and learn by undergoing a multi-process journey. 2. It derives motivation from themes, thus leading to activities of project-based learning programs to create a learning atmosphere of "entering the classroom with a question, and leaving with a number of questions." 3. Creative activities rich in language learning and inspire children's interest in learning words. The "Please Listen to Me" Reading Scheme trains up children to recognize and read a lot of English and Chinese vocabulary; The "Free Writing Scheme" increases children's positive attitude towards writing, so as to enhance their ability to use words and write short essays. 4. Native-speaking English teachers prepare school-based teaching materials from daily life scenarios to help children easily master the ability to listen, speak, read and spell. 5. The school adopts Orff Schulwerk in the music activities and makes use of various musical elements to effectively achieve balanced development of children's imaginative capacity, ability of abstraction, spatial intelligence and emotional intelligence, so as to build a foundation for learning instruments in the future. 6. Children become the master of the "Free Play", they have the rights to making choices, planning, creating and discovering. 7. The school infuses an artistic sense into everyday teaching and popularizes art education in daily activities. Children are guided innovatively to participate in learning activities with various artistic elements.</p>	
Assessment of children's learning experiences	
<p>Teachers continue to observe, record, collect, reorganize and analyze pictures and text works by using "High Scope Preschool Child Observation Record" (COR) as an indicator.</p>

Curriculum planning	
<p>We take strong consideration on children's moral development through the curriculum focusing on moral, intellectual, physical, and aesthetic aspects. We also design open-ended and diversified learning environment for children to develop positive morals and obtain a balanced whole-person development.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>According to children's interests, abilities and experience, as well as things related to children's life, our school curriculum formulates appropriate comprehensive courses, including: "design activities", "thematic learning" and "picture book teaching", allowing children to observe, discuss, Construct learning by means of operation, sharing and application. Promote children's learning motivation and learning spirit, enhance creativity and problem-solving ability, and develop inner potential.</p>	
Assessment of children's learning experiences	
<p>The assessment follows the principle of children's overall physical and mental development. Teachers and parents work together to record children's performance and abilities in all aspects through continuous observation, so as to understand children's growth. In addition, children also participate in self-assessment and self-reflection, so as to understand their own strengths and uniqueness, and enhance their self-worth.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>To develop children's multiple intelligences, we design the curriculum according to children's behaviour characteristics, needs, abilities, interests and life experience. Besides, we will hold different activities based on curriculum themes so that children can learn in a relaxing and pleasant environment and gain all-round development.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>To develop children's multiple intelligences, we provide computer and online multimedia teaching and toy books, create a pleasant learning environment and leverage diversified activities and learning and teaching modes to motivate children to learn actively, explore and develop thinking potentials, so as to help them gain balanced development in morality, intelligence, physical ability, sociability and art, establish a correct outlook on life and develop a personality of "truth, kindness and beauty".</p>	
Assessment of children's learning experiences	
<p>We record children's academic performances based on on-going observation and make a Personal Study Portfolio to follow up their progress.</p>	

School Characteristics	
School vision and mission	
<p>Sticking to Sik Sik Yuen's principle of "centring on students" and "teaching students in accordance with their aptitudes", we are committed to providing children with a pleasant learning environment with diversified and children-centred teaching methods, excellent teachers and abundant teaching facilities. In this way, children can learn knowledge inside and outside classrooms and learn skills of getting along with people in group life. More importantly, we inspire children to learn in an initiative manner and help them grow in all aspects healthily and happily.</p>	
Support to students	
<p>We have new students and P.1 adaption period, English playgroup and interest activity class and provide appropriate supports for individual students based on their needs.</p>	
Support to non-Chinese speaking (NCS) students	
<p>Arrange interpretation / translation services; engage NCS parent volunteers to enhance communication between school and parents; create an inclusive learning environment to facilitate students' integration; collaborate with non-governmental organisations (NGOs) to create an inclusive learning environment.</p>	
Support to students with special needs	
<p>Joining the On-site Pre-school Rehabilitation Services. Attached Integrated Programme in Kindergarten-cum-child care centre</p>	
Link with parents	
<p>Parent-teacher association : Yes</p>	
Other activities / communication with parents	
<p>Parents' day, parent class observation, parent-child trip, game day, parents' talk, parent interest class, parents volunteers and school activities (Eg, parent-child walking, sports and children's exhibitions, etc.).</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Our curriculum follows the "Kindergarten Education Curriculum Guide" (2017) and adopt "child-centredness". We arrange the curriculum according to children's physical and mental development and learning interests. We engage English teachers and Mandarin teachers in school to promote children's language development and improve their biliterate and trilingual competence; leverage teaching aids and activities to inspire children's logical thinking and build basic mathematical concepts; tell stories and hold mixed-age activities to help children foster a good moral character; and offer musical and artistic education programmes to arouse children's interest in music and art and help them cultivate creativity.</p>	
<p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>We adopt child-centredness teaching methods, with theme-based and group-based teaching methods to promote children's active learning attitude, interpersonal communication and development in art, physical ability and cognition. We also teach students information technology by equipping each classroom with a computer, touch TV and Internet system. We provide a variety of activities such as visiting, community services, uniform teams and learning activities, to enable children to learn from practical experience.</p>	
Assessment of children's learning experiences	
<p>Our school will build a portfolio for each student and systematically record children's growing process by continuous observation, records and analyse. By systematically recording children's mental and physical development, we can identify their studying needs, and provide necessary assistant and guidance.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>We provide children with an opportunity to understand the "Love" of Jesus Christ so they will grow up in an environment to love and be loved. We set teaching objectives according to the school guidelines of the Education Bureau and the Catholic Diocese of Hong Kong and children's physical and mental development and life experience. We aim to help them learn and gain new knowledge and skills, form an active learning attitude and develop potentials and problem solving ability.</p>	
<p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>We provide interesting activities (such as religious education, English, Mandarin, visiting, trips, mock activities, project-based learning, inquiry and little experiments) to help children develop an active learning attitude, develop creativity and thinking ability and practice in life.</p>	
Assessment of children's learning experiences	
<p>We have on-going observation and analysis on the progress of each child and prepare a Children's Growth Portfolio.</p>	

School Characteristics	
School vision and mission	
<p>Carrying forward the Christian spirit of caritas and serving others, we teach children to be grateful and cherish and love life following the example of St. Francis of Xavier and train children as future builders of the society. Taking Christ as the foundation of our education, we pass the spirits of unswerving determination and bravery of St. Francis of Xavier on to children and educate children to respect and love their friends, be confident and solve their own problems.</p>	
Support to students	
<p>During the adaption period of new students, we organize activities and workshops together with community groups and professional agencies. We also invite incoming students to take part in the parent-child activities to help the parents and their children learn more about the school life.</p>	
Support to non-Chinese speaking (NCS) students	
<p>Arrange interpretation / translation services; create an enriched language environment for mastery of the Chinese language; create an inclusive learning environment to facilitate students' integration; facilitate professional development for teachers to develop effective strategies to help NCS students learn Chinese.</p>	
Support to students with special needs	
<p>Joining the On-site Pre-school Rehabilitation Services.</p>	
Link with parents	
Parent-teacher association : No	
Other activities / communication with parents	
<p>To promote home-school cooperation, we add parent seminars, parent class observation, seminars, parent-child art creation, fun day, trips and visits. We actively promote parents' voluntary work in school activities, and hold parents' meetings and fellowship activities on a regular basis to let parents better understand our school mission and manage the school together with us.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Overall curriculum is based on early childhood development theory, while implementation of the curriculum depends on physical and mental development, and learning interests of the children in different classes, with adjustment according to individual needs of children. By emphasizing teacher-student interaction and personal experience, together with activities like games, visits and experiments, it induces children's learning motivation and spirit of exploration, as well as improving their life skills. Under the teaching of native English and Mandarin tutors, the learning environment is rich in bilingual communication opportunities to promote language development and enhance the ability of biliteracy and trilingualism.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>By exploring in themes of living experience, together with group learning, children learn to cooperate with others from an early age. Besides, various diversified learning corners are set up for children to choose by themselves and carry out personal learning individually, so as to arouse their initiative to learn and develop personal learning potential, as well as to foster their initiative to explore and strengthen their thinking skills, in order to promote balanced development in knowledge, skills and attitudes. The school attaches importance to practice in daily life, so it often brings children out to the community to learn in a real situation. As a result, students can broaden their horizons and knowledge. Due to emphasis on language development, it developed its own curriculum, including: "pre-training in writing", "writing program" and "oral cognition training", to help children develop their language skills.</p>	
Assessment of children's learning experiences	
<p>1. Continuous assessment is used; 2. Assess on daily activities so that children can show their ability in a more authentic and concrete way; 3. Assessment information come from teachers, parents and children; 4. Development are recorded and reported more comprehensively and systematically by "children development portfolio".</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>With students as our main focus, we strive to support high-quality learning through the development of integrity, positive values and attitudes towards life and learning. We create a safe, healthy, and well-equipped environment in which they can thrive and grow from. Our commitment adapts to the physical and mental development of young children with various interests and abilities. We implement a relevant, yet diversified, array of activities to provide an inclusive learning environment that is best suited to the child's individual strengths and needs. Our spiral curriculum is firmly integrated across each grade and subjects to promote its sustainable development to enrich the learning process; which is to help children achieve a well-balanced development of their moral, intellectual, physical, social, and aesthetic qualities.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Through environmental stimulation, we provide different learning areas within our classrooms to engage children in independent procedures that allow for them to make a choice, carry out their ideas, and reflect on their activities with adults and peers. Children use their senses of sight, hearing, taste, smell and touch to explore, and understand new things in their environment. They develop self-confidence, initiative, creativity and problem-solving skills in the learning progress, and build up positive attitudes to self, others and to future learning. We observe the development of children's language and strengthen their listening, speaking, reading and writing skills by creating meaningful context to their contributions, which nurtures their interest in language and good learning attitudes. English and Putonghua are widely integrated in our school where children get to immerse in a relaxing and joyful surrounding, allowing them to conform to the diversified language environment in Hong Kong.</p>	
Assessment of children's learning experiences	
<p>We value feedback, whether formal or informal, verbal or written. Using specific examples to illustrate each child's academic performance, we recognize their hard work and help them understand the significance of goals set. Formative assessment in the manner of classroom questioning, observation, discussion, experience sharing, peer review and other means, carries the advantage of a more holistic assessment of each child's overall academic performance, while continuous observation records their learning process for the compilation of personal learning portfolios.</p>	

School Characteristics	
School vision and mission	
<p>Adhering to our motto of "Love, Respect, Diligence, Honesty", we provide students with substantial knowledge, training skills and opportunities for physical exercise, focusing on cultivating students' good character, noble sentiments and right attitude to life, in order to achieve a balanced development in all five domains.</p>	
Support to students	
<p>We are significantly and continuously provided with resources from Po Leung Kuk, such as educational clips from Central Campus TV and English Learning Center to create an interactive and inquiry-based learning environment through multi-sensory stimulation and IT equipment. The Central Library cum Resource Center also provides educational resources to promote early readers and enhance interest in reading.</p>	
Support to non-Chinese speaking (NCS) students	
<p>Create an inclusive learning environment to facilitate students' integration.</p>	
Support to students with special needs	
<p>Joining the On-site Pre-school Rehabilitation Services.</p>	
Link with parents	
<p>Parent-teacher association : Yes</p>	
Other activities / communication with parents	
<p>We have established the parent-teacher association for many years. In previous years our parent-teacher association has organized many family activities, parent discussions, promotions, and participation in community education campaigns to develop a seamless collaboration between parents and school. We continue to care for our student's healthy growth and have participated in the Preschool Oral Health Program organized by the HKU School of Dentistry. Furthermore, PLK has implemented the Smoke-Free Community Initiative by the Department of Health to develop a set of "smoke-free education" material for children to establish a positive, smoke-free healthy attitude towards life.</p>

Curriculum planning	
<p>Our school will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. We design a spiral, sequential and child-oriented school-based curriculum based on children's physical and mental development, interests, abilities and needs. It emphasizes on cultivating children's good character, self-motivate learning, creative thinking and healthy living habits, and is committed to let children learn and grow in a safe, hygienic, pleasant and caring environment.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Our school raises children with biblical truth as its values. Through free play and designing enlightening learning activities, children can "learning by doing" thereby developing children's potential, creative thinking, problem-solving ability, exploration spirit and independent learning ability. It will also stimulate children's learning through thematic teaching and project-based learning. At the same time, it will cooperate with diversified activities such as site visits, school picnic, game days, birthday parties, parent-child reading programs and community activities, etc., allow children to gain personal experience from different activities and strengthen learning and development.</p>	
Assessment of children's learning experiences	
<p>Through continuous observation and periodic evaluation, record the development of children's language, early mathematics, science, physique, aesthetics, emotions, social skills and self-care ability. We collect children's works and evaluation samples, organize and analyze the children's personal development files, so as to understand the performance of children in all aspects, and regularly report and communicate with parents to promote children's learning ability and realize children's potential.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Goals are set in accordance with children’s development needs, notably into five targets such as cognitive and language, physical fitness and health, affection and sociability, aesthetics and culture. Through classroom learning and extracurricular activities, young children can develop these generic skills required for lifelong learning and independence to live out the educational goal of "all-round development".</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Our teachers adopt the Picture book Teaching Method that combines story themes with teaching methods in exploring various learning domains so children can learn proactively and happily in this thought-stimulating environment, inspiring children integrated artistic and creative thinking , as well as making the best use of IT to enhance their own learning effectiveness.</p>	
Assessment of children’s learning experiences	
<p>We focus on the learning process, with assessment no longer tied to children's memory nor rote learning, and instead use a comprehensive assessment strategy that combine continuous observation assessment and summative assessment that charts children's overall development.</p>
