Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Focusing on child-centredness, our curriculum places emphasis on developing children's knowledge, skills, values and attitudes. The curriculum involves six learning areas, providing all-rounded, balanced and appropriate education, while at the same time nurtures children's development in Moral, Cognitive and Language, Physical, Affective and Social, as well as Aesthetic. We aim to provide appropriate care to meet children's development on growth, ability, interest and experience. We respect the individuality of each child and will exercise flexibility in teaching. Special subject teachers will be arranged to hold activities on biliteracy and trilingualism.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>The focus is on daily-life oriented topics and interesting stories that stimulate children's problem-solving, exploration, and creative thinking. The learning content is enriched with picture books and diverse integrated activities designed to enhance the learning experience. Bilingual development is emphasized to improve language abilities through interactive methods. An online parent-child reading program has been established to provide guidance on recommended Chinese and English books for parents, cultivating a love for reading in children. The classrooms feature interest corners equipped with abundant teaching materials, where children engage in exploratory activities using their five senses, encourages children to be more proactive and self-motivated in learning through play, and combined with self-selected grouping method, cultivates children to become active learners.</p>	
Assessment of children's learning experiences	
<p>We adapt both formative and summative assessments, which include reports on knowledge, skills, values and attitudes. Through daily observation and different teaching themes, teachers can assess children's continuous development and will provide reports on picture book activities, behavioral observation and work analysis. Assessment reports that summarize children's overall learning development will be distributed twice a year. Learning Portfolio with all reports and photos of children in various learning activities will be distributed.</p>	

School Characteristics	
School vision and mission	
<p>We aim to provide all-round quality services and continuously strive to improve and maintain a high standard of service to both children and parents. Our overall objective is to nurture the children by employing whole-person development in the domains of "Moral", "Cognitive and Language", "Physical", "Affective and Social" as well as "Aesthetic". This will lay a solid foundation and prepare the children for lifelong learning.</p>	
Support to students	
<p>Teachers and school social workers will observe children's behaviour regularly to offer help and care. Accommodation classes will be held for new students. Primary school visits will be arranged for children.</p>	
Support to non-Chinese speaking (NCS) students	
<p>Teachers will help NCS children in various ways to deepen their knowledge in social environment, facilities and local culture. We will design games to enhance their motivation on using Chinese language and to enforce their listening, speaking, reading and writing skills.</p>	
Support to students with special needs	
<p>Joining the On-site Pre-school Rehabilitation Services. We respect the diversity of children and by joining services to support children's learning and development. Qualified and experienced teachers will keep in touch with parents to care for children's health and growth.</p>	
Link with parents	
Parent-teacher association : No	
Other activities / communication with parents	
<p>Parents will better understand our mission through parent meetings, class observations and seminars. We will contact parents and collect their opinions by phone and interviews. Online communication will be used and will invite parents of alumni to join school activities to share their experience.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Clement Kindergarten advocates the curriculum content and teaching policy of "age-appropriate, amount-appropriate, developmentally-appropriate". According to the six major learning areas of early education, the school compiles it steps and implements the concept of "timely learning and practice".</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>The school uses international high-quality picture books for theme teaching, so that children can be exposed to diversified and multi-angle reading materials from an early age, and cultivate an international perspective. The school uses the environment to create and provide self-discovery learning and special STEM courses in the preschool stage. For example, there are small restaurant, vegetable shop, butcher, flower shop and a library in the simulated real-life small community. Develop children's self-directed, creative and problem-solving skills. In our school's mindfulness art curriculum, some mindfulness activities / games are appropriately added according to the level, so that while children acquire artistic skills and music knowledge, they also learn to pay attention to, recognize their own body feelings and emotions, as well as feel and appreciate from the perspective of mindfulness - " Small but beautiful things in life".</p>	
Assessment of children's learning experiences	
<p>When new students enter school, teachers will conduct weekly adaptation assessments for children; preschool classes will conduct periodic continuous assessments to continuously observe and evaluate children's developmental stages and performance; K1-K3 classes have theme assessments for each theme; Each child compiles a child development history file to record the child's learning and physical and mental development in each school year.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Our curriculum is divided into four levels of programs for children aged 2 to 6 years old. Through seasonal unit themes, we teach an integrated curriculum that consists of twelve monthly programs. Following the Bi-literacy and Tri-lingualism Policy, we have native English teachers and Mandarin teachers in residence.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>We adopt an English immersion approach for English teaching. We introduce an activity-based teaching method in which children are grouped to take part in various activities. Based subject needs, we organize activities including outdoor visits, planned activities, scientific experiment, celebration and whole language teaching.</p>	
Assessment of children's learning experiences	
Continuous unit assessment.

Curriculum planning	
<p>We design children-centred curriculum according to children's development. We offer learning contents according to children's life experience and interests, and provide diversified activities, such as inquiry-based science, drama, Orff Music and creative art activities, to nurture balanced development of children in all aspects. Moreover, we will also provide multi-sense learning, encourage exploration to improve children's information handling and problem solving abilities, and regularly inspect the appropriateness of curriculum.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Highlighting innovation and self exploration, children are encouraged to go out of the classrooms to take part in community activities such as visits. Classroom learning includes activity teaching, learning projects and group study; Orff-Schulwerk is adopted in music teaching and English classes are given by foreign teachers. There are also interest-oriented classes, etc.</p>	
Assessment of children's learning experiences	
<p>Build a study portfolio and have on-going assessment. Study assessment is made every month and summative assessment is made every semester to record children's study results and developments in every aspect.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>By means of stories as the theme in teaching, we arrange the learning progress from the shallower to the deeper according to the development of children. We will also conduct class-based project learning activities in each class according to the children's interest. Meanwhile, based on children's individual learning needs, we design hierarchical games to allow children to learn through the game, and to take care of the differences between students. The content of the course emphasizes positive education, moral education, arts, investigation and games as the principles of curriculum design to foster the whole-person development of children.</p>	
<p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Game-based learning approach and a variety of learning activities enable the children to "learn through experiences". These activities include outings, little experiments, snack cooking, painting and visits. We also focus on self learning, aiming to improve children' abilities in social intercourse, problem solving and self-care in an interactive manner.</p>	
Assessment of children's learning experiences	
<p>Through continuous observation, evaluation and feedback, we affirm children's development and learning situation, which is based on the balanced development goals of children's moral, intellectual, physical, social and aesthetic aspects of virtues as the main focus. The assessment records to reflect the situation of children's development. In addition to the data and chart records, there will be more detailed text analysis that fully reflects the children's learning achievement and progress.</p>

Curriculum type : Local	
Curriculum planning	
<p>The curriculum is formulated and implemented based on the Education Bureau's Kindergarten Education Curriculum Guide, adhere to the "child-centred" principle and in accordance with the children's mental and physical development, life experience and learning interest. We are dedicated to developing children's potential and nurturing them to attain all-round development in the domains of spiritual, ethics, intellect, physique, social skills and aesthetics.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>We adopt the Thematic approach, by connecting the six learning areas of "Physical Fitness and Health", "Language", "Early Childhood Mathematics", "Nature and Living", "Self and Society" and "Arts and Creativity". Children will learn through life experiences, sensory stimulation and interesting activities, together with visits, discussion and free exploration in play. They are able to acquire knowledge and learn how to cooperate with others and solve problems in a lively and cheerful atmosphere. Our English and Putonghua courses are designed and taught by native speaking teachers. They help children cultivate an interest in learning English and Putonghua through participating in enjoyable and authentic activities, such as listening to or reading stories, playing games and daily conversations.</p>	
Assessment of children's learning experiences	
<p>Continuous assessment with on-going observation, records and analysis of children's overall performance at school.</p>	

School Characteristics	
School vision and mission	
<p>1. Based on the Catholic Christian beliefs and values, we provide quality kindergarten education, promote love and caring culture, and educate children to respect themselves and others and be compassionate. 2. With "Joy in Duty" as our school motto, we aim at cultivating a good learning attitude for children so that they can be well-equipped for further education, continuous search for truth as well as future contribution to the society. 3. We are dedicated to developing children's potential and nurturing them to attain all-round development in the domains of spiritual, ethics, intellect, physique, social skills and aesthetics.</p>	
Support to students	
<p>1. Orientation programs for parents, adaptation period for newly admitted K1 students. 2. Appropriate transition arrangements, such as primary school visit, primary one adaptation programs and "Transition to Primary" talks for parents. 3. Support children with emotional, behavioral or family problems.</p>

Curriculum planning	
<p>Based on child development theories, we compile a 'child-oriented' curriculum that matches children's physical and mental demands, interest and life experience of the age. Adopting the Whole book Approach, our curriculum lets children explore through play to cultivate the habit of self-learning. We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Based on a variety of picture books' contents, we arrange outdoor visiting and learning activities for children so that they can learn from practical experience. To improve children's language competence, we have created a language environment, encourage children to read and pay attention to strengthening children's ability to listen, speak, read and write. Moreover, we provide interest activities for children to learn English and Mandarin.</p>	
Assessment of children's learning experiences	
<p>Based on picture books' contents, we arrange diversified activities for children learning through play and building the ability to listen, speak, read and write while reading. The curriculum would not only foster children's reading interests but also moral development through picture books. We introduce the element of play into our school schedule, providing opportunity for children to learn interactively by explorative, interesting and real-life ways, through six learning areas, which are "Physical Fitness and Health", "Language", "Early Childhood Mathematics", "Nature and Living", "Self and Society" and "Arts and Creativity". Moreover, we arrange English and Mandarin activities to enhance children's language development. As a result, the mentioned learning activities aim at promoting children's whole child development.</p>	

School Characteristics	
School vision and mission	
<p>We provide quality education, encourage children to learn in an initiative way, develop children's sense of responsibility and good manners, value parental education, and promote home-school cooperation.</p>	
Support to students	
<p>We have school social workers who provide appropriate coaching for families and children in need. We also regularly hold student seminars, parent-child games and parents workshops, and arrange adaption period for new students when they enrolled. Besides, we provide appropriate supports for children proceeding to the primary school, e.g. holding P.1 mock activities and visiting school.</p>	
Support to non-Chinese speaking (NCS) students	
<p>Received Grant for Support to NCS Students; create an enriched language environment for mastery of the Chinese language; create an inclusive learning environment to facilitate students' integration.</p>	
Support to students with special needs	
<p>Joining the On-site Pre-school Rehabilitation Services. Joining Integrated Programme in Kindergarten-cum-Child Care Centre.</p>	
Link with parents	
<p>Parent-teacher association : No</p>	
Other activities / communication with parents	
<p>There is a parent volunteer team which assists in dealing with the administrative affairs of the school and implementing school activities, so as to improve school transparency to help the parents learn about the operation of the school and strengthen the sense of belonging. Besides, the usual contacts and regularly held parents' meetings, seminars, parent-child workshops, parent-child trips and celebrations and arrangement of home visits can help parents know the school activities and their children's development and learning conditions, and improve home-school cooperation.</p>

Curriculum planning	
<p>Our curriculum is designed to nurture children's learning interest and motivation for exploration, help them to construct knowledge through life experience, enrich creative thinking, embrace challenges in ever-changing society and explore potential at the fullest extent. It also prepares children to be future citizens who are confident, able to think, cooperative, well communicated and inclusive. The "3C Curriculum" is designed to stimulate children's 3C abilities, namely, to develop children's ability in communication, collaboration and creativity. The school began to implement "Positive Education" in 2018 to deepen the school-based 3C curriculum. With focused professional training and practice, "Positive Education" has achieved initial results. In order to continue to optimize the school-based curriculum and further integrate the concept of "life education", through the model of home-school collaboration, let children practice kindness to others and have empathy, and cultivate the character of "kindness".</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>The "child-centered" "3C Curriculum" focuses on the construction of experience and integrated learning. Class activities are carried out through "play" in an integrated approach. According to children's characteristics, teachers create a rich and lively environment and design meaningful scenarios relating to children's life to help them explore and think in depth. We aim to help children acquire firsthand experience in activities and provide them the opportunity to explore freely with ample time via diversified and interactive learning environment, so as to stimulate their creativity and improve their communication and collaboration abilities. English classes are given with "shared reading approach" so that children can learn English in relaxing and life-based classroom activities. We engage English majors and foreign teachers to teach English so as to create a more favourable environment for children to learn English.</p>	
Assessment of children's learning experiences	
<p>The learning progress of students is recorded based on our daily observations. We have established a development assessment system to record and analyze children's developments, supplemented with a personal Portfolio. We also collect necessary information to learn about their learning progress and provide proper tutorship according to their actual needs.</p>

Curriculum Details	
Curriculum type : Non-local	
Curriculum planning	
<p>Our curriculum has been designed according to the early childhood education guideline set out by the Hong Kong Education Bureau and incorporates the content of Cambridge English into the English curriculum. Every class is taught by English/Cantonese or English/Putonghua class teachers. Japanese classes are also available. Our learning content is designed to match our students' developments and interest. Through an incremental and interactive learning experience, children will sharpen their multilingual skills as well as enhance their independent thinking and love of learning in a relaxed and happy environment. Our aim is to enhance the students' English language foundation and facilitate a smooth transition to local primary schools.</p>	
Learning / Teaching approach & activities	
<p>We encourage our students to develop their skills as curious and inquisitive learners. Each of our classes consists of two class teachers- a Native English speaker and a Putonghua speaker. Relax, fun and interactive hands-on learning activities are a major part. Small group learning is an integral part of our students' day and allows them to fully engage with their learning. We are continually encouraging our students to be proactive, enthusiastic and have a good conduct. The school runs extra-curricular activities, including the Hong Kong Road Safety Patrol, Happy Bee and Grasshopper Ring, to enable our students to build on their team work skills and build their confidence while learning how to participate in the community around them. The school provides opportunities for our students to participate in external, off-campus and community performances and visits to enable our students to widen their vision while enriching their communication skills and life experiences.</p>	
Assessment of children's learning experiences	
<p>Continuously evaluate and observe children's abilities through six aspects including "Language", "Arts and creativity", "Physical and fitness and health", "Nature and living", "Self and society" and "Early childhood mathematics". A continuous evaluation portfolio is established to record children's learning experience and to strengthen the communication with parents therefore the teaching can be tailored.</p>

School Characteristics	
School vision and mission	
<p>It is our aim to provide quality early childhood education that fosters our student's ethics, intellect, social and physical skills. We provide a nurturing, learning environment for students aged 2 to 6 years. We encourage our students to become keen and engaged learners, innovators and leaders with strong communication and language skills, who are willing to take on responsibility and expand their problem solving skills. We are continually improving to provide a higher quality of education.</p>	
Support to students	
<p>We run new students adaption day and briefing sessions for new families to the school. We communicate with parents on a regular basis. We provide courses to enhance adaptation skills for class promotion and Primary One Simulation courses to ensure our graduates a smooth transition to primary school. We also organise briefing sessions and interview classes for our graduates and their families to help with primary school admission interviews.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Our school is an authorized International Baccalaureate World School. Our core language (Chinese and English) program is taught primarily through The Teachers College Reading and Writing Project. As the world's first kindergarten in cooperation with the Harvard University School of Education Project Zero, our curriculum is delivered via "Maker-Centered Learning". Incorporating this concept together with the International Baccalaureate Program (Primary Years Programme), our school cultivates young children with the spirit of being the "Maker", enhancing their curiosity and understanding of their surroundings, enabling them to build and learn by creating and designing.</p>	
Learning / Teaching approach & activities	
<p>By providing a rich environment with multiple learning areas that are designed according to different transdisciplinary themes, children's interest and learning are stimulated through inquiry. They learn to discover and explore from multiple perspectives using various tangible resources as a result, develop critical thinking skills across different subject areas and cultivate a positive learning attitude.</p>	
Assessment of children's learning experiences	
<p>On-going assessment is done based on daily observations, supplemented with portfolios and developmental reports. Systematic observation and analysis on the development of each child enable parents to have multiple perspectives of their child's development. All information will be shared with the parents periodically throughout the school year electronically.</p>

School vision and mission	
<p>To develop innovative learning and teaching environments that foster teachers' professionalism and help children reach their full potential. We deeply believe that the childhood years are the most important for growing and learning.</p>	
Support to students	
<p>At the beginning of the semester, we have a gradual adaptive program for children to adjust to school life. Parents' day is organized for teachers and parents to discuss ways to help their children with their academic development. Learning support is provided to children in needs and records are kept for follow-up in the future.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
Based on child development theories and researches, we determine the curriculum according to children's physical and mental development needs and learning interests; pay attention to children's all-round and balanced development and uniqueness;	
Learning / Teaching approach & activities	
Our school adopts project approach and thematic approach in our curriculum. We focus much on cultivating children's life experiences and civic awareness, hence news sharing is one of our daily activities. We do organize visits, interviews with professionals, field trips, parent-child activities to align with our teaching contents. We value children's creativity and artistic development – despite literary and arts activities every afternoon, children's art exhibitions and creative drama shows are held annually. We also encourage children's learning through play-free play sessions are scheduled every day, with different constructive materials complementing the element of exploration. This will facilitate children's problem-solving skills, as they learn to discuss, express, they will demonstrate qualities of perseverance and acceptance. Children will learn to construct play environments, develop creativity and imagination, thus enhancing their intellectual, social, moral, emotional and physical development. Our school believes that, mathematics and natural sciences are indispensable scopes of early childhood education. STEM learning activities are gradually taking place in our school, to promote and strengthen children's spirit of exploration. Through a great variety of activities, children will establish an understanding towards the relationship between life and technology, creativity and problem-solving skills of children will as well be fostered.	
Assessment of children's learning experiences	
The school makes daily performance records and student assessment to track students' developments in cognition, physical ability, language, emotion, sociability and art.
